

Brainstorming & Idea Prioritization

Date	21-06-2026
Team ID	XXXXX
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Step 1: OptiCrop Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Venkata Sudha Rani Konakalla	Use soil nutrients and climate parameters to recommend a suitable crop.	Data & Research	1
2	Harika Antervedi	Provide a simple form for entering N, P, K, temperature, humidity, pH and rainfall.	User Experience	1
3	Aswini Appireddygar (Team Lead)	Train and integrate a machine-learning model for crop recommendation.	ML & Planning	1
4	Harinadh Gatta	Build a responsive Flask-based interface with input validation.	Web Development	2
5	Siva Eeduri	Test predictions and browser compatibility and prepare the project for deployment.	Testing & Deployment	3
6				

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	ML-based crop recommendation using soil and climate parameters.	High	High	1	Yes
2	Responsive Flask web interface with input validation.	High	High	2	Yes
3	Testing, deployment readiness and	Medium	Medium	3	Yes

Brainstorming & Idea Prioritization

	future scalability.
