Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 Enter Field Data	Stage 2 Get Prediction	Stage 3 Use Recommendation
Actions <i>What does the customer do?</i>	• Opens OptiCrop • Collects soil/climate values • Enters N, P, K, temperature, humidity, pH and rainfall	• Submits the form • Waits for model processing • Reviews recommended crop and confidence	• Considers the recommendation • Compares with field conditions • Uses the result for crop-planning support
Touchpoint <i>What part of the service do they interact with?</i>	• OptiCrop web page • Input form • Validation messages	• Flask backend • ML prediction engine • Results section	• Recommended crop output • Confidence result • Project guidance
Customer Thought <i>What is the customer thinking?</i>	• Are my values correct? • Is all required data entered? • Will this suit my field?	• Which crop will be recommended? • How confident is the model? • Is the result easy to understand?	• Can I use this for planning? • Does it match local conditions? • What other factors should I consider?
Customer Feeling <i>What is the customer feeling?</i>	Curious but cautious while entering field data.	Interested and expectant while waiting for the prediction.	More informed and confident, while still considering practical field conditions.
Process Ownership	Farmer / User Input Interface	OptiCrop Flask Application ML Prediction Engine	Farmer / User Decision Support

Who is in the lead on this?			
Opportunities How can we improve this stage?	• Add clearer input guidance • Improve validation • Support easier data entry	• Improve prediction explanation • Show confidence clearly • Optimize response time	• Add crop details • Include local advisory factors • Support future recommendations
