

Project Demo Planning

Date	07 July 2026
Team ID	XXXXXX
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents OptiCrop effectively, covering the problem, machine-learning workflow, implemented features, testing, and deployment in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Introduce OptiCrop and explain the agricultural crop recommendation objective	2	Aswini Appireddygar
2	Problem Statement	Explain the need for data-driven crop selection using soil and climate parameters	2	Venkata Sudha Rani Konakalla
3	Solution Overview	Explain Flask architecture, trained ML model, seven input parameters, and prediction workflow	3	Harika Antervedi
4	Live Feature Demonstration	Demonstrate parameter input, validation, crop recommendation, confidence, and crop guidance	5	Harinadh Gatta
5	Testing & Deployment Demonstration	Show Playwright testing, GitHub repository, and live Render deployment	5	Siva Eeduri
6	Conclusion & Q&A	Summarize the project, future scope, and answer evaluator questions	3	Entire Team

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Discuss challenges in selecting a suitable crop from soil nutrients and environmental conditions
2	Solution Overview	Explain the OptiCrop workflow: seven inputs, Flask backend, scikit-learn model, prediction, and confidence
3	Live Feature Demonstration	Demonstrate input validation, crop recommendation, confidence, water requirement, soil, fertilizer, and cultivation tip
4	Testing, Deployment & Q&A	Show Playwright testing, GitHub repository, Render deployment, and answer questions
